WORK EXPERIENCE

Barracuda Networks November 2024 – Present | Ottawa, ON
Senior Full Stack Software Engineer
- Optimized our customer data platform by decreasing loading times by 90%
- Set up our **terraform CI/CD** pipelines and our **AWS** managed services
- Implemented automated **B2B AWS lambdas** with external orgs
- Created a Databricks genie AI and integrated it, front and backend
- Created ETL Data pipelines on Databricks.

Qlik April 2022 – September 2024 | Ottawa, ON
Full Stack Software Engineer
- Spearheaded the MFA release, increasing MFA usage by over 50%
- Implemented **end-to-end** solutions with **React, NodeJS, Go, DynamoDB**
- Reduced load times for fetching tenants by over 80%
- Implemented tenant management API that reduced support times by 90%

CIBC November 2020 – April 2022 | Toronto, ON
Senior Software Developer
- Implemented **Golang** microservices **APIs** for payment processing
- Lead the implementation of a Payment Processing system with VISA (B2B)
- Programmed high frequency processes to decrease latency by 75+%

Statistics Canada January 2019 – May 2020 | Ottawa, ON
Software Developer
- Used python to perform **data science** and **analysis** on big data
- Created **MERN Stack REST APIs** to integrate an existing **SQL** database
- Implemented a grain transport service optimizer, decreasing time by 20%

PROJECTS

Traffibound | MERN stack start up project
May 2024 – current | Ottawa, On
- Building a **fullstack** web/mobile app for a client in the car sales industry
- Implemented **back-end APIs, SQL DB**, and a **React front-end** for the app
- Hosting the application on **AWS** with focus on scalability and consistency
- Allow dealerships to track inventory and seamlessly operate as needed

Jp7sfootball.com | MERN stack freelance project
January 2024 – April 2024 | Ottawa, On
- Developed a **full-stack web** app for CFL Ottawa Redblacks star using **React MaterialUI, Node ExpressJS**, and **MongoDB**
- Integrated **Stripe API** for seamless registration and payment processing
- Implemented **CI/CD** pipelines for continuous improvement
- Streamlined registration and payment handling for users

Koga.world | React freelance project
May 2022 – September 2022 | Ottawa, On
- Developed a **web application** for Ottawa-based music collective Koga
- Built with a modern **React front-end** to highlight the best of the collective
- Integrated **Spotify's APIs** delivering the group's music

EcoSnap | *CuHacking JetBrains Challenge Winner*
February 2020 | Ottawa, On
- Developed a **Kotlin android app** utilizing the phone's camera for recyclable object identification via an **Artificial intelligence backend**
- Provided users with recycling instructions based on **AI image analysis**
- Implemented a leaderboard connected to a **Firebase database** for users
